as of June 30, 2017

OUSA
LISTED
NYSE ARCA

O'Shares FTSE U.S. Quality Dividend ETF (OUSA) is designed to be a core investment holding, providing cost efficient access to a portfolio of large-cap and mid-cap high quality low volatility dividend paying companies in the United States selected based on fundamental metrics including:

QUALITY • LOW VOLATILITY • DIVIDEND YIELD

OUSA is an exchange traded fund (ETF) that seeks investment performance that correlates generally to price and yield before fees and expenses of the FTSE U.S. Qual/Vol/5% Capped Factor Index.

Why OUSA?

OUSA provides investors a simple way to own a portfolio that adheres to core investment principles of:

INCOME: which means investing in companies that generate cashflow and pay dividends;

DIVERSIFICATION: investing in 10 sectors in an attempt to protect your investment capital and limit volatility;

CAPITAL APPRECIATION: investing in quality companies with strong financial performance that could appreciate in value over time in addition to paying dividends.

O'Shares Method Box

Large Cap Blend

The method box reveals a fund's investment strategy. For the equity holdings in the fund's portfolio, the vertical axis shows the market capitalization of the stocks owned and the horizontal axis shows investment style (value, blend or growth).

Quarterly Performance (as of 6/30/2017)

	1 MTH	3 MTH	6 MTH	1 YR	QTD	YTD	S / I
NAV %	-0.53	1.92	7.62	8.00	1.92	7.62	22.46
Market Value %	-0.50	1.99	7.54	8.15	1.99	7.54	22.51

NAV: The dollar value of a single share, based on the value of the underlying assets of the fund minus its liabilities, divided by the number of shares outstanding. Calculated at the end of each business day.

Market Price returns are based upon the midpoint of the bid/ask spread at 4:00PM Eastern time (when NAV is normally determined), and do not represent the returns you would receive if you traded shares at other times.

Performance data quoted represents past performance and is no guarantee of future results. Current performance may be lower or higher than the performance data quoted. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than original cost. Returns less than one year are not annualized. About O'Shares Investments

O'Shares ETF Investments is a provider of exchange traded funds (ETFs) formed by ABC Shark Tank investor and CNBC contributor Kevin O'Leary, Chairman and experienced portfolio manager Connor O'Brien, CEO. O'Shares ETFs use the FTSE Russell Quality/Volatility/Yield rules-based indexes for investing in large cap dividend paying equities. These indexes provide a rules-based approach for investing in the U.S., Europe and Asia-Pacific regions, designed to meet the objectives of the O'Leary Family Trust, which seeks more yield, less risk and strong long-term investment performance.

These indexes also reflect the core investment principles used successfully in guiding the investment strategy for the O'Leary Family Trust and O'Leary Funds investment management firm. O'Shares ETFs are designed to provide investors with core long-term investments, that provide income, limited volatility and attractive performance.

** The 30-day SEC yield is calculated with a standardized formula mandated by the SEC. The formula is based on maximum offering price per share and includes the effect of any fee waivers. Without waivers, yields would be reduced. The 30-day unsubsidized SEC yield does not reflect waivers in effect. A fund's actual distribution rate will differ from the SEC yield and any income distributions from the fund may be higher or lower than the SEC yield.*

Disclosure: Before you invest in O'Shares Investments funds, please refer to the prospectus for important information about the investment objectives, risks, charges and expenses. To obtain a prospectus containing this and other important information, please visit www.oshares.com to view or download a prospectus online. Read the prospectus carefully before you invest. There are risks involved with investing including the possible loss of principal.

Concentration in a particular industry or sector will subject the Funds to loss due to adverse occurrences that may affect that industry or sector. The funds may use derivatives which may involve risks different from, or greater than, those associated with more traditional investments. The funds' emphasis on dividend-paying stocks involves the risk that such stocks may fall out of favor with investors and underperform the market. Also, a company may reduce or eliminate its dividend after the Fund's purchase of such a company's securities. Returns on investments in foreign securities could be more volatile than, or trail the returns on, investments in U.S. securities. Exposures to foreign securities entail special risks, including political, diplomatic, economic, foreign market and trading risks. In addition, unless perfectly hedged, the Fund's investments in securities denominated in other currencies could decline due to changes in local currency relative to the value of the U.S. dollar, which may affect the Fund's returns. The funds' hedging strategies may not be successful, and even if they are successful, the funds' exposure to foreign currency fluctuations is not expected to be fully hedged at all times. See the prospectus for specific risks regarding the Fund.

The securities of small capitalization companies are often more volatile and less liquid than the stocks of larger companies and may be more affected than other types of securities during market downturns. Compared to larger companies, small capitalization companies may have a shorter history of operations, and may have limited product lines, markets or financial resources.

Past performance does not guarantee future results. Shares are bought and sold at market price (not NAV), are not individually redeemable, and owners of the Shares may acquire those Shares from the Funds and tender those shares for redemption to the Funds in Creation Unit aggregations only, consisting of 50,000 Shares. Brokerage commissions will reduce returns.
