About O'Shares Investments

O'Shares ETF Investments is a provider of exchange traded funds (ETFs) formed by ABC Shark Tank investor and CNBC contributor Kevin O'Leary, Chairman and experienced portfolio manager Connor O'Brien, CEO. O'Shares ETFs use the FTSE Russell Quality/Volatility/Yield rules-based indexes for investing in large cap dividend paying equities. These indexes provide a rules-based approach for investing in the U.S., Europe and Asia-Pacific regions, designed to meet the objectives of the O'Leary Family Trust, which seeks more yield, less risk and strong long-term investment performance. These indexes also reflect the core investment principles used successfully in guiding the investment strategy for the O'Leary Family Trust and O'Leary Funds investment management firm. O'Shares ETFs are designed to provide investors with core long-term investments, that provide income, limited volatility and attractive performance.

* The 30-day SEC yield is calculated with a standardized formula mandated by the SEC. The formula is based on maximum offering price per share and includes the effect of any fee waivers. Without waivers, yields would be reduced.

There are risks involved with investing, including possible loss of principal. Concentration in a particular industry or sector will subject the Funds to loss due to adverse occurrences that may affect that industry or sector. The funds may use derivatives which may involve risks different from, or greater than, those associated with more traditional investments. The funds' emphasis on dividend-paying stocks involves the risk that such stocks may fall out of favor with investors and underperform the market. Also, a company may reduce or eliminate its dividend after the Fund's purchase of such a company's securities. The securities of small capitalization companies are often more volatile and less liquid than the stocks of larger companies and may be more affected than other types of securities during market downturns. Compared to larger companies, small capitalization companies may have a shorter history of operations, and may have limited product lines, markets or financial resources. See the prospectus for specific risks regarding the Fund.

Past performance does not guarantee future results. Shares are bought and sold at market price (not NAV), are not individually redeemable, and owners of the Shares may acquire those Shares from the Funds and tender those shares for redemption to the Funds in Creation Unit aggregations only, consisting of 50,000 Shares. Brokerage commissions will reduce returns.
