

O'Shares FTSE Europe Quality Dividend ETF (OEUR) is designed to be a core investment holding, providing efficient and transparent access to a portfolio of large-cap and mid-cap dividend paying companies in Europe selected based on several fundamental metrics such as:

**QUALITY • LOW VOLATILITY • DIVIDEND YIELD**

OEUR is an exchange traded fund (ETF) that seeks investment performance that correlates generally to price and yield before fees and expenses of the FTSE Developed Europe Qual/Vol/Yield 5% Capped Factor Index.

**Why OEUR?**

OEUR provides a simple, cost efficient and transparent way for investors to own a portfolio of companies and investment strategy that adheres to our core investment principles:

**INCOME:** which means investing in companies that generate cashflow and pay dividends;

**DIVERSIFICATION:** investing in 10 sectors in an attempt to protect your investment capital and limit volatility;

**CAPITAL APPRECIATION:** investing in quality companies with strong financial performance that could appreciate in value over time in addition to paying dividends.

**O'Shares Method Box**

The method box reveals a fund's investment strategy. For the equity holdings in the fund's portfolio, the vertical axis shows the market capitalization of the stocks owned and the horizontal axis shows investment style (value, blend or growth).

Annualized daily standard deviation from inception date (8/19/2015). NAV: The dollar value of a single share, based on the value of the underlying assets of the fund minus its liabilities, divided by the number of shares outstanding. Calculated at the end of each business day. Market Price returns are generally based on market value at 4:00PM Eastern time (when NAV is normally determined), and do not represent the returns you would receive if you traded shares at other times. Fund returns assume that dividends and capital gains distributions have been reinvested in the Fund at NAV.

Performance data quoted represents past performance and is no guarantee of future results. Current performance may be lower or higher than the performance data quoted. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than original cost. Returns less than one year are not annualized. OEUR Index: FTSE Developed Europe Qual/Vol/Yield 5% Capped Factor Index. The FTSE Developed Europe Index is comprised of large and mid-cap stocks providing coverage of the Developed markets in Europe.

### Index Methodology

The FTSE Developed Europe Qual/Vol/Yield 5% Capped Factor Index (FEFQVY5N) is designed to measure the performance of publicly-listed large-capitalization and mid-capitalization dividend-paying issuers in Europe that meet certain market capitalization, liquidity, high quality, low volatility and dividend yield thresholds, as determined by FTSE Russell (the "Index Provider"). The high quality and low volatility requirements are designed to reduce exposure to high dividend equities that have experienced large price declines. ### About O'Shares Investments

O'Shares Investments provides ETFs for long-term wealth management, with an emphasis on quality across our family of ETFs. O'Shares ETFs are designed for investors with objectives ranging from income and wealth preservation to growth and capital appreciation. Each of the O'Shares ETFs reflects our rules-based investment philosophy, including quality as an important characteristic. At O'Shares, we prefer the ETF form of investment fund for cost-effective, tax-efficient, and transparent access to investment portfolios. At O'Shares, we aim to serve investors by keeping investing simple, straightforward and easy to understand. O'Shares ETFs are all managed according to rules-based indexes, and all are listed on the NYSE.

\* The 30-day SEC yield is calculated with a standardized formula mandated by the SEC. The formula is based on maximum offering price per share and includes the effect of any fee waivers. Without waivers, yields would be reduced. A fund's actual distribution rate will differ from the SEC yield and any income distributions from the fund may be higher or lower than the SEC yield.

There are risks involved with investing including the possible loss of principal. Concentration in a particular industry or sector will subject the Funds to loss due to adverse occurrences that may affect that industry or sector. The funds may use derivatives which may involve risks different from, or greater than, those associated with more traditional investments. The funds' emphasis on dividend-paying stocks involves the risk that such stocks may fall out of favor with investors and underperform the market. Also, a company may reduce or eliminate its dividend after the Fund's purchase of such a company's securities. Returns on investments in foreign securities could be more volatile than, or trail the returns on, investments in U.S. securities. Exposures to foreign securities entail special risks, including political, diplomatic, economic, foreign market and trading risks. In addition, unless perfectly hedged, the Fund's investments in securities denominated in other currencies could decline due to changes in local currency relative to the value of the U.S. dollar, which may affect the Fund's returns. See the prospectus for specific risks regarding the Fund.

Past performance does not guarantee future results. Shares are bought and sold at market price (not NAV), are not individually redeemable, and owners of the Shares may acquire those Shares from the Funds and tender those shares for redemption to the Funds in Creation Unit aggregations only, consisting of 50,000 Shares. Brokerage commissions will reduce returns.
